[HIV Prevention and Testing](#)

[HIV Prevention for Women](#)

Office of Women’s Health website for the prevention of HIV in women. It is possible to prevent getting an HIV infection or passing the virus to your partner or baby but women face unique challenges in preventing HIV.

[Top Questions about HIV Prevention and Women](#)

[Delaware HIV Consortium](#)

The CDC recommends testing for HIV as a routine part of medical care for all persons ages 13-64 (HIV testing should be routine for people over aged 64 as well if you are sexually active or if you share needles to inject drugs). If you engage in higher risk behaviors (unprotected sex or share needles to inject drugs) it is best to be tested every three to six months. The sooner that a person finds out that they are HIV positive, the less likely they are to pass along the infection to others.

FREE in-home test kits are available by [signing up HERE](#).

FREE HIV testing is also available at Consortium offices, 100 W. 10th Street, Suite 415, Wilmington, by calling [302-654-5471](#), Monday through Thursday, 9 am – 3 pm, Friday 9 am – 12 pm.

HIV TESTING LOCATIONS IN DELAWARE

The following agencies offer HIV testing. In most cases, HIV testing is free. However, you should check with the agency first to be sure and to find out their hours for testing. You can also call the Delaware AIDS Hotline at [800-422-0429](#) to find the site closest to you.
